An add-on module of NX Nastran - Basic, the Advanced Nonlinear solver is an integration of the well-known and highly regarded ADINA solver into NX Nastran as Solution 601 for implicit solutions or Solution 701 for explicit solutions.

NX Nastran Advanced Nonlinear - Solution 601/701 Fact Sheet

(Redirected from NX Nastran) NASTRAN is a finite element analysis (FEA) program that was originally developed for NASA in the late 1960s under United States government funding for the aerospace industry. The MacNeal-Schwendler Corporation (MSC) was one of the principal and original developers of the publicly available NASTRAN code.

AdvNL - Translation from NAstran to Adina input I have installed FEAMP 10.1.1 with NX Nastran 7.0. When running a Sol601 Analysis the translation process from nastran to adina format ("read nastran input" comment in the *.f06 file) takes a very long time - about 15 minutes for a 200000 Node Model.

The Nastran file is imported into ADINA and some small modifications are made. The analysis is then performed with ADINA and the results are translated to universal file format for post-processing in NX. Previously, we had given an overview of how ADINA can be used with various third party pre- and post-processors (ADINA News, March 30, 2008).

Nastran Input One of the key capabilities in ADINA for interfacing to other finite element modeling software is file import to ADINA via the Nastran file format. The user can create the finite element model in another program (e.g., NX (Simcenter 3D), Femap, Ansa, Hypermesh) and export the model to a Nastran file.

ADINA CAE Interfaces

At work we do all meshing in Ansa,from Beta-CAE, and import the meshes via the NX Nastran format to ADINA. Both for ADINA Structures and ADINA CFD the volume mesh is covered with shell elements,...

I'm using NX 9.0 (but I also have NX 10 or 7.5 if needed) with nastran and one small other question. I don't know if I should start a new thread for that one because I think it's something done easily. I want to export my model to a .step file. But I can only find the option to export it to .stp. I need to deliver my part as .step file.

Hola!, Detrás del módulo No Lineal Avanzado de NX NASTRAN (SOL601/701) se esconde una auténtica joya tecnológica desconocida por muchos usuarios de FEMAP: es capaz de tratar no linealidades geométricas, incluye numerosos modelos de material no lineal, no linealidades por contacto "superficie-a-superficie" y realiza los siguientes tipos de análisis:
